

TECHNICAL DATA SHEET

CLOUT 2000

CLOUT 2000 is a concentrated one shot detergent in granular form, having the following outstanding features:

- **Balanced level of phosphates to soften the water and to prevent greying of linen as a result of "hardness salts".**
- **CMC to prevent re-deposition and to improve colour.**
- **Optical Brighteners at a maximum level to impart a brilliant finish to all white work, and a special stain removing compound.**
- **Complex Silicates to maintain the pH of the wash liquor at a constant high level. Also contributes to suspend soil in solution and prevent (greying) re-deposition onto the linen.**
- **A special blend of liquid non-ionic emulsifiers and surfactants formulated to facilitate the removal of oils, grease and deeply embedded soils from all washable fabrics, both cotton and synthetics.**
- **Suitable for all machines including twin tubs.**

USES:

- **Works equally well in hard or soft water.**
- **Effective at high as well as low temperatures.**
- **Helps soap saving in hard water areas.**
- **Easy to use and versatile.**
- **Safe on coloured linen at high temperatures.**
- **The addition of chlorine bleach is not needed.**

RECOMMENDATION:

WHITE WORK: 400 TO 500g PER 50kg LOAD AT 85°C

COLOURED: 400 TO 500g PER LOAD AT 60°C
