

TECHNICAL DATA SHEET

EXELL 101

DESCRIPTION:

EXELL 101 is a complete one shot detergent in granular form, having the following outstanding features:

- **A high level of phosphates to soften the water and to prevent greying of linen as a result of 'hardness salts'.**
- **C M C to prevent redeposition and to improve colour.**
- **Optical brighteners at a maximum level to impart a brilliant finish to all white work.**
- **Complex silicates to maintain the pH of the wash liquor at a constant high level. Also contributes to suspend soil in solution and to prevent redeposition onto the linen.**
- **A special blend of liquor, non-ionic emulsifiers and surfactants formulated to facilitate the removal of oils, greases and deeply embedded soils from all washable fabrics, both cotton and synthetics.**

USES:

- **Works equally well in hard or soft water**
- **Effective at high as well as low temperatures**
- **Effects soap savings in hard water areas**
- **Easy to use: versatile**

RECOMMENDATIONS:

WHITE WORK: 400 TO 500 GRAMS PER 50 KG LOAD AT 85°C.

COLOURED: 400 TO 500 GRAMS PER 50 KG LOAD AT 60°C.
