

TECHNICAL DATA SHEET

KARGLO

DESCRIPTION:

KARGLO is an opaque viscous liquid detergent, containing a blend of synthetic detergents, wetting agents and waxes. It removes oily soil deposits, road dirt and other airborne films leaving a clean shiny surface when rinsed.

KARGLO restores the lustre hidden by soils, and is safe on chrome, painted surfaces, aluminium and rubber.

APPLICATIONS:

For the cleaning of motorcars, trucks, bus bodies, trailers, caravans etc.

KARGLO can be used by machine or manually.

For use in an automatic car wash rotating brush machines, dilute 1 part of KARGLO to 200 parts of water.

For manual cleaning, dilute 1 part of KARGLO to up to 100 parts of water. It is recommended that the vehicle is wetted first to help remove the loose and heavier soiling. Karglo can then be applied to wash and wax – followed by a thorough rinsing, hand or air dry.
