

TECHNICAL DATA SHEET

SPOTCLOR

DESCRIPTION:

SPOTCLOR is a concentrated organic chlorine bleaching powder, which can be added directly into the laundry machine. It releases chlorine slowly to ensure safe and effective bleaching without damage to the fabric.

SPOTCLOR sequesters any iron present in the water or steam supply, thus preventing yellowing.

DIRECTIONS FOR USE:

SPOTCLOR should be used in the first rinse after the hot wash cycle. The temperature should not exceed 70°C.

Add 50 to 100 grams of SPOTCLOR to a 45kg load depending on the amount of staining to be removed.

CAUTION:

SPOTCLOR is a strong oxidizing agent. Store in a tightly sealed container; away from strong acids and organic matter. Protect the product from coming into contact with water.
